- Testimonials will be displayed on the website

Regarding real-time Google review sync:

It is technically possible to implement using Google APIs, but it involves additional setup, API usage limits, and ongoing maintenance.

So, for this project, I'll implement a stable and professional approach:

- Display selected testimonials on the website
- "View on Google" option for full live reviews
- Option to embed Google reviews for dynamic visibility

If you specifically require real-time review sync using Google API, it can be implemented as an advanced feature with additional charges due to the extra integration and maintenance involved.

Let me know how you'd like to proceed 👍

◆ Domain & Hosting:

- The domain (e.g., .com/.in) will be registered under your ownership so you receive renewal notifications directly
- Domain cost is yearly and needs to be renewed to keep the website active
- The website will be hosted on a secure cloud platform with HTTPS (secure access)
- Domain will be connected to the hosting to make the website live

◆ Maintenance:

- I'll provide 3 months of free maintenance (bug fixes & minor updates)
- After that, maintenance can be continued if required

◆ Payment Terms:

- 25% advance to begin the project
- Remaining amount before final delivery
- Work will start once the advance is confirmed

◆ Scope Note:

- This website focuses on showcasing your work and handling enquiries
- Advanced booking/payment systems are not included in this phase

Let me know if you'd like to add or modify anything before I begin 👍
